

## WATER COMMITTEE

*To take initiative to solve the water problem in the community. The community set up water committee to identify the problem and look for resources and solutions after two months of TCD knowledge transferring activities.*

## TESTING THE WATER

*The water committee take leadership and manage to do the water testing along with GHNI staff. We use Aquagenix water testing tools to know if the water is contaminated or not. The testing is simple. The water committee was trained on how to use the tools. Of course, the result shows that the water is contaminated with E.coli.*

## ALTERNATIVE SOLUTIONS

- *Health education*
- *Boil the water before drinking*
- *Bio-sand water filtration System*
- *Sanitation*
